

Reno Tennis Center Pickleball Drop In Guidelines

The purpose of our Drop In Program is to provide the opportunity for **ALL** players to play during peak times. Drop In play is scheduled on courts **15** and **16** with corresponding paddle rotation racks. When all courts are full, it is required that players take turns to allow everyone to play. We encourage players to meet new people, introduce themselves and mix up play when possible.

Rotation System for Waiting Players:

- Players should place their paddles in the corresponding paddle rotation rack to play!
- If one player is waiting, one of the losing players drops-out.
- If two or more players are waiting, both losing players drop-out.
- Winning players who play in a succeeding second game should drop-out after completing the second game.

Win By One Point:

Games are played to 11 points. If there are waiting players, drop-in games are won by one point. If there are no waiting players, players may elect (prior to the end of the game) to win by either one or two points.

South Side Serves First:

The south side of the court will serve first. Remember that the team that serves first just gets one fault before turning the ball over to the opponents.
